

ANMOL JOSHI

Software Engineer

Bengaluru, India | [Gmail](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Cambridge Institute of Technology - B.E. Computer Science Engineering | Bengaluru | Aug 2023 - May 2027

CGPA: 7.0/10 | Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP

TECHNICAL SKILLS

Programming Languages : Java, JavaScript, Python , GO

Frameworks : React.js, Node.js, Express.js

Databases : MySQL, MongoDB

Backend & APIs : RESTful APIs, JWT Authentication, Socket.IO

Core Concepts : Data Structures & Algorithms, Object-Oriented Programming, DBMS, System Design

Tools : Git, Docker, Figma

SUMMARY

CSE student focused on **Software Development** with hands-on experience in **Java, Python, JavaScript, React.js, Node.js, SQL, REST APIs, Docker, and Git**. Built scalable applications involving **authentication, real-time systems, databases, API gateways, load balancing, and fault-tolerant architectures**.

EXPERIENCE

InAmigaos Foundation | Data analytics Intern | Virtual | Aug 2026 - Sept 2026

Worklet: AI-Powered Data Analysis and Automated Research Insights

1. Performed **data collection, cleaning, preprocessing, and analysis** to transform unstructured research information to structured set
2. Applied **AI-assisted data analysis techniques** to identify patterns, generate insights, and develop a structured analytical report.
3. Documented **research findings and data-driven insights**, improving the usability and presentation of analyzed information.

DL uploads Pvt Ltd | web developer Intern | Virtual | mar 2025 - nov 2025

Worklet : Full-Stack Web Development and Marketplace Application Development

1. Developed **10+ reusable React.js components** to build responsive and scalable web application interfaces.
2. Integrated **5+ REST API endpoints** and implemented reusable UI components to support core application functionality.
3. Developed **3+ marketplace workflows** covering media upload, content discovery, and purchase-related functionality.

SELECTED PROJECTS

CampusPulse - Full-Stack Campus Management Platform | React.js, Node.js, Express.js, Socket.IO | [GitHub](#)

- Engineered a full-stack campus platform with **React.js, Node.js, Express.js, MySQL, and REST APIs**, supporting scalable campus-service workflows.
- Implemented **JWT authentication, role-based access control, and Socket.IO real-time communication** to secure and enhance user interactions.
- Integrated **TF-IDF and cosine similarity** for intelligent content matching and campus-service recommendations.

Dataplane — Fault-Tolerant API Gateway & Load Balancer | Go, REST APIs, Docker, Prometheus, k6 | [GitHub](#)

- Engineered a **fault-tolerant reverse proxy and API gateway in Go** with load balancing, health checks, and backend failure handling.
- Implemented **circuit breakers, retries, and backend recovery** to improve service resilience and ensure reliable request routing under failures.
- Containerized the gateway using **Docker** and integrated **Prometheus monitoring and k6 load testing** for observability and performance validation.

NeuroScreen.AI - Neurological Screening | Python, ML, Computer Vision, Audio, Gait, Behavioral Analysis| [GitHub](#)

- Built a **multimodal ML pipeline** for early neurological condition screening using **audio, gait, and behavioral analysis**.
- Developed automated **feature extraction, preprocessing, and classification** workflows across multiple analysis modalities.
- Integrated model outputs to generate **structured screening results and condition-specific predictions**.

Certifications

- **Natural Language Processing (NLP)** - Visvesvaraya Technological University [Link](#)
- **React.Js Certification** - HackerRank [Link](#)
- **Introduction to Cybersecurity** — Cisco Networking Academy [Link](#)
